UNIT 1 PRINCIPLES OF PHARMACY PRACTICE........1

Chapter 1
The Profession of Pharmacy ........3
Ancient Origins........................................3
Pharmacist..............................................4
    Evolution of the Pharmacist’s Role........5
    Role of the Pharmacist..........................6
    Education and Licensing Requirements....8
Pharmacy Technician................................9
    Evolution of the Pharmacy
        Technician’s Role 9
    Education and Licensing Requirements...10
    Work Environments and Conditions ....10
    Characteristics of the Pharmacy
        Technician........................................10
Pharmacy Workplace of Today...............11
    Community Pharmacies .....................11
Institutional Pharmacies ....................12
    Hospital Pharmacy .............................12
    Home Healthcare Systems...................13
    Long-Term Care Facilities..................13
Managed-Care Pharmacy Services ....14

Chapter Terms ........................................16
Chapter Summary....................................17
Chapter Review.....................................18

Chapter 2
Pharmacy Law, Regulations,
and Standards for Technicians.......21
Need for Drug Control .........................21
    Brief History of Statutory Pharmacy Law ....22
        Pure Food and Drug Act of 1906 ..........22
        Food, Drug, and Cosmetic Act of 1938....23
        Durham-Humphrey Amendment
            of 1951 .........................................24
        Kefauver-Harris Amendment of 1962....24
        Comprehensive Drug Abuse Prevention
            and Control Act of 1970...............25
        Poison Prevention Packaging Act
            of 1970 .......................................25
        Drug Listing Act of 1972..................26
        Orphan Drug Act of 1983..................27
        Drug Price Competition and Patent-Term
            Restoration Act of 1984................27
        Prescription Drug Marketing Act
            of 1987 .......................................27
        Omnibus Budget Reconciliation Act
            of 1990 ....................................27
        Dietary Supplement Health and
            Education Act of 1994 .................28
## Contents

- **Health Insurance Portability and Accountability Act of 1996**........29
- **Food and Drug Administration**.................................30
- **Medicare Prescription Drug, Improvement and Modernization Act of 2003**........30
- **Regulatory Laws—Role of National Oversight Agencies**........30
- **Food and Drug Administration**.................................30
- **MedWatch**................................................................31
- **Vaccine Adverse Event reporting System**.........................31
- **Drug Enforcement Administration**.................................32
- **Registration with the Drug Enforcement Agency**................32
- **Prescriber**..................................................................32
- **Emergency Dispensing of Schedule II Drugs**....................32
- **Right to Refuse a Controlled Substance Prescription**........33
- **Drug and Professional Standards**.................................33
- **United States Pharmacopeia**........................................33
- **National Associations of Boards of Pharmacy**..................34
- **State Boards of Pharmacy and Legal Duties of Pharmacy Personnel**........34
- **Violation of Laws and Regulations**...............................35
- **Civil Law**...................................................................38
- **Law of Agency and Contracts**.....................................38
- **Torts**.........................................................................38

### Chapter Review

**Chapter Review** ................................................42

## Chapter 3

### Drugs, Dose Forms, and Delivery Systems

**Pharmaceuticals**..................................................47
- **National Drug Code**...........................................48
- **Classes of Drugs**...............................................48

**Sources of Drugs**................................................49
- **Drugs from Natural Sources**.................................49
- **Synthetic, Synthesized, and Semisynthetic Drugs**........50

**Uses of Drugs**.....................................................51
- **Therapeutic Agents**.............................................51
- **Pharmacodynamic Agents**....................................52
- **Diagnostic Agents**..............................................52
- **Prophylactic Agents**...........................................52
- **Destructive Agents**.............................................52

**Comparison of Dose Forms and Delivery Systems**........53
- **Solid Dose Forms**...............................................54
- **Tablets**..........................................................54
- **Capsules**........................................................56

**Suppositories**....................................................57
**Effervescent Salts**..............................................57
**Implants or Pellets**.............................................58
**Lozenges, Troches, or Pastilles**................................58
**Plasters**..................................................................58
**Powders and Granules**........................................58

**Liquid Dose Forms**.............................................58
**Solutions**..........................................................59
**Dispersions**.......................................................60

**Inhalation Dose Forms**........................................62
**Delivery Systems**................................................62
- **Inhalation Delivery Systems**..................................62
- **Syringe, Injection, and Infusion Delivery Systems**........63
- **Intrauterine and Cervical Delivery Systems**................65
- **Transdermal Delivery Systems**...............................65
- **Other Delivery Systems**.......................................65
- **Drug References**................................................66

### Chapter Terms

**Chapter Terms** ..................................................67

### Chapter Summary

**Chapter Summary** .............................................69

### Chapter Review

**Chapter Review** ................................................70

## Chapter 4

### Routes of Drug Administration

**Factors Influencing the Route of Administration**........75
- **Ease of Administration**.......................................75
- **Site of Action**..................................................76
- **Onset of Action**................................................76
- **Duration of Action**............................................76
- **Quantity of Drug**..............................................76
- **Metabolism by the Liver or by the Kidney**................77
- **Toxicity**..........................................................77

**Oral Routes of Administration**...............................77
**Oral Dose Forms**................................................77
**Advantages and Disadvantages of the Oral Route**........78
**Dispensing and Administrating Oral Medications**........78

**Topical Routes of Administration**..........................80
**Topical Dose Forms**............................................80
**Advantages and Disadvantages of the Topical Route**....80
**Dispensing and Administrating Topical Medications**....82
- **Ointments, Creams, Lotions, and Gels**.....................82
- **Transdermal Patches**........................................82
- **Ophthalmic Medications**....................................82
- **Otic Medications**.............................................83
- **Nasal Medications**............................................84
- **Inhaled Medications**.........................................84
- **Vaginal Medications**.........................................84
UNIT 2
COMMUNITY PHARMACY

Chapter 6
Dispensing Medications in the Community Pharmacy

Community Pharmacy Operations

Technician Duties Related to Dispensing
Over-the-Counter Drugs and Diet Supplements

Technician Duties Related to Dispensing
Prescription Drugs

Guidelines for Receiving and Reviewing
Prescriptions
Checking for Patient Allergies
Receiving a Controlled-Drug Prescription
Patient Profile
Medication Selection and Preparation
Preparing Oral Dose Forms
Dispensing Prepackaged Drugs
Dispensing Schedule V Over-the-Counter Drugs
Dispensing Drugs that Contain Ephedra
Choosing Containers
Label Preparation
Final Check of the Prescription

Chapter Terms
Chapter Summary
Chapter Review

Chapter 7
The Business of Community Pharmacy

Managing Computer Systems
Parts of a Computer System
How Pharmacy Computer Systems Work
Billing and Third-Party Administration
Processing Prescription Drug Claims
Medicaid Prescription Billing
Medicare Prescription Drug, Improvement, and Modernization Act of 2003
Inventory Management
Purchasing
Receiving
Inventory Management Processes
Inventory Management Requirements for Controlled Substances
Business Math Used in Pharmacy Practice
Markup
Discount
Average Wholesale Price Applications
Capitation Fee

Chapter 8
Extemporaneous Compounding..175
Need for Extemporaneous Compounding....175
Equipment for Weighing, Measuring, and
Compounding.............................179
Balances....................................179
Forceps and Spatulas.................180
Compounding Slab.......................180
Mortar and Pestle ......................180
Grades and Pipettes.................181
Master Formula Sheet..............181

Technique for Weighing Pharmaceutical
Ingredients..............................181
Technique for Measuring Liquid Volumes..184
Percentage of Error.....................185
Commination and Blending of Drugs......186
Geometric Dilution Method...........186
Examples of Compounding
Preparations.............................186
Solutions.................................187
Suspensions............................188
Ointments and Creams ...............189
Powders..................................190
Suppositories...........................191
Capsules.................................191
Labeling, Record Keeping,
and Cleanup...........................192
Reference Sources for the Compounding
Pharmacy.................................193

UNIT 3
INSTITUTIONAL
PHARMACY .........................199

Chapter 9
Hospital Pharmacy Practice ....201
Hospital Pharmacy Services........201
Inpatient Drug Distribution Systems ....202
Unit Dose Packaging...............202
Repackaging Medications..........203
Medication Orders..................205
Floor Stock.............................206
Intravenous Admixture Service....207
Clinical Services.....................210
Drug Information Services.........211
Outpatient Pharmacy Services.....212
Automation in the Hospital Pharmacy...212
Inventory Management.............213

Chapter Terms .........................170
Chapter Summary .......................171
Chapter Review .........................172

Chapter 10
Infection Control and Safe
Handling of Hazardous Agents...227
Infection Control.........................227
Development of Germ Theory of
Disease.................................227
Microorganisms and Disease........228
Viruses.................................229
Bacteria.................................229
Fungi.................................229
Protozoa..............................229
Aspesis and Sterilization..........229
Heat Sterilization...................230
Dry Heat Sterilization ..............230
Mechanical Sterilization.........230
Gas Sterilization....................230
Chemical Sterilization..............231
Contamination.........................231
Touch.................................231
Air....................................231
Water.................................231
Aseptic Technique and USP 797..........231
Handling and Disposal of Hazardous
Agents.................................235
Receipt and Storage of Hazardous
Agents.................................235
Protective Clothing...................236
Technique for Handling Hazardous
Agents.................................236
Hazardous Agent Spills.............238
Procedures in Case of Exposure......239
Oral Hazardous Dose Forms.......239

Chapter Terms .........................221
Chapter Summary .......................222
Chapter Review .........................223

Chapter 11
Preparing Sterile Intravenous
Products.................................245
Intravenous Preparations...........245
Characteristics of Preparations.....245

Contents
Methods of Injection........................................246
Equipment Used in IV Preparation..................246
Syringes ................................................247
IV Sets ................................................248
Filters ................................................251
Catheters .............................................252
Peripheral Venous Catheters ...252
Central Venous Catheters 252
Other Types of Catheters 253
Pumps and Controllers.........253
Preparing IVs ...........................................254
IV Preparation Guidelines ..............254
Vials ..............................................255
Ampules .............................................255
IV Solutions ...................................255
Preparing a Label for an IV
Admixture ............................................258
Calculations for the Hospital Pharmacy
Technician ........................................260
Time Conversions .........................260
Temperature Conversions ..............260
Electrolytes ......................................261
Understanding Millimoles and
Milliequivalents 262
Determining the Milliequivalents
of Compounds 263
Converting between Milligrams
and Milliequivalents ..........263
Measuring Electrolytes .................264
Specific Gravity ...............................264
Calculation of IV Rate and
Administration ................................265

Chapter Terms ..........................................268
Chapter Summary ......................................269
Chapter Review ........................................270

UNIT 4
PROFESSIONALISM IN
THE PHARMACY .........................275

Chapter 12
Medication Safety .......................277
Medical Errors ..................................277
Medication Errors ............................278
Healthcare Professional’s
Responsibility ..................................278
Patient Response ............................278
Physiological Causes of Medication
Errors ........................................279
Social Causes of Medication Errors 280
Categories of Medication Errors 280
Root Cause Analysis of Medication
Errors ........................................281
Prescription Filling Process in Community
and Hospital Pharmacy Practice ..........282
Step 1: Receive Prescription and Review
Patient Profile .............................282
Step 2: Enter Prescription into
Computer ..................................284
Step 3: Generate Prescription Label ....285
Step 4: Retrieve Medication ..........286
Step 5: Fill or Compound Prescription ..287
Step 6: Review and Approve
Prescription ..................................288
Step 7: Store Completed Prescription ..289
Step 8: Deliver Medication to Patient ..290
Medication Error Prevention ..........291
Patient Education ............................292
Innovations to Promote Safety 293
Medication Error and Adverse Drug Reaction
Reporting Systems .........................294
States and Boards of Pharmacy ..........294
Joint Commission on Accreditation for
Healthcare Organizations 295
United States Pharmacopeial
Convention ..................................295
Federal Drug Administration .......295
Institute for Safe Medication Practices 296

Chapter Terms ..........................................298
Chapter Summary ......................................299
Chapter Review ........................................300

Chapter 13
Human Relations and
Communications .........................303
Personal Service in the Contemporary
Pharmacy ..................................303
Attitude and Appearance ...............304
Appear Professional .....................304
Respond to Customers .................305
Know Your Pharmacy ...............305
Smile and Make Eye Contact .......306
Use Common Courtesies ..........306
Be Sensitive to Cultural and
Language Differences .................306
Follow the Policies and Procedures 307
Do Not Dispense Medical or
Pharmaceutical Advice ..........307
Telephone Courtesies ..................308
Interprofessionalism .....................308
Other Aspects of Professionalism ....309
Professional Behavior .................309
Verbal and Nonverbal Communication 310
Discrimination and Harassment ....311
Patient Confidentiality ................311
Respect the Customer’s Privacy ....312
Health Insurance Portability and
Accountability Act ......................313
Electronic Data Transactions ..313
Privacy and Security ..............314
### Appendix A
Common Prescription Abbreviations

### Appendix B
Greek and Latin Word Parts

### Appendix C
Most Commonly Prescribed Drugs

### Appendix D
Common Drugs That Cannot Be Crushed

### Appendix E
Look-Alike, Sound-Alike Medication Recommendations and Reference Table

### Glossary

### Chapter 14
Your Future in Pharmacy Practice

- Increasing Your Employability
  - Professionalism and the Technician
  - Certification and the National Certification Examination
  - Recertification
  - Hierarchy of Technician Positions
  - Professional Organizations
- Ethics in Pharmacy Practice
  - Code of Ethics Statements
  - Dilemmas and Questions Facing Healthcare Professionals
- Adjusting to the Work Environment
- Job Search
  - Clarify Your Career Goals
  - Write a Good Résumé
  - Establish a Network
  - Identify and Research Potential Employers
  - Write a Strong Cover Letter
  - Prepare for the Interview
- Trends in Pharmacy Practice
- Workforce Issues
  - New Medicines and New Drug Development Technologies
  - New Dose Forms and Drug Delivery Mechanisms
  - Robotics
  - Continued Growth in Clinical Applications
  - Increased Emphasis on Home Healthcare
  - Increased Emphasis on Managed Care
  - Increased Technician Responsibility and Specialization
  - Increased Geriatric Applications
  - Increased Healthcare and Drug Costs
