Several organizations involved with economics education worked together to produce the Voluntary National Content Standards in Economics as a guide to economics instruction in American schools. These groups included the National Council on Economic Education and its network of councils and centers, the Foundation for Teaching Economics, the National Association of Economic Educators, and the American Economic Association’s Committee on Economic Education. This table shows the chapters, sections, and special features in *Economics: New Ways of Thinking* that support the teaching of the 20 Voluntary National Content Standards in Economics.

| **Standard 2**  
Marginal Cost/Benefit  
Effective decision making requires comparing the additional costs of alternatives with the additional benefits. Most choices involve doing a little more or a little less of something; few choices are “all or nothing” decisions. | Chapter 1, Section 2  
Chapter 7, Section 3  
Chapter 8, Section 1 |
